Faculty Position Announcement
Department of Industrial & Systems Engineering, KAIST

March 20, 2019

The Department of Industrial & Systems Engineering at KAIST invites applications for tenure-track faculty positions at the levels of Associate/Assistant Professor. Applicants should have a background in industrial & systems engineering, operations research and management science, or related engineering majors that enable them to address system problems in manufacturing and service industries. At this moment, we are particularly interested in applicants pursuing research in the following areas:

- Optimization
- Applied statistics
- Machine learning and big data analytics
- Human factor engineering including human-computer interaction (HCI)
- Production and service operations management

We seek candidates with the potential to develop new frontiers of the discipline. Industrial or academic experience will be considered preferably, and Ph.D. candidates who are expected to earn their degree within one year will also be considered. We seek candidates with academic excellence, intellectual capacity, integrity and potential for future impact in the industrial & systems engineering discipline.

Application documents along with an up-to-date CV should be sent to:

Professor Taesik Lee
Head of the Department of Industrial & Systems Engineering, KAIST
Email: taesik.lee@kaist.edu
Phone: +82-42-350-3101

Application materials should be submitted no later than April 15, 2019 to receive full consideration.
